PROFESSIONAL SUMMARY

Experienced Software Engineer with **2+ years** of hands-on experience building cloud-native, scalable, and secure enterprise systems. Specialized in backend engineering using **.NET / .NET Core**, microservices architecture on **AKS, and Azure OpenAI** integrations, with deep expertise in distributed cloud architecture on Microsoft Azure and **CI/CD-driven DevOps** automation. Experienced in developing modern frontends using **React** and **TypeScript**, while delivering high-quality, secure, and performance-optimized solutions.

PROFESSIONAL EXPERIENCE

Software Engineer - Strategic Systems International

Mar 2026 – Present

- Designed secure integrations and modernized Azure architecture by introducing new services and re-architecting legacy systems for better scalability and maintainability.
- Optimized API performance by reducing query load by **60–80%** and eliminating EF Core inefficiencies across critical endpoints.
- Developed and deployed **10+ scalable** ASP.NET Core Web APIs on Azure App Service with CI/CD pipelines. Leveraged Azure Functions and Service Bus for asynchronous processing, improving reliability for high-volume workloads.
- Led end-to-end delivery of a stocks Performance Report module, owning architecture and coordinating a small team from requirements to production.
- Refactored ASP.NET Core backend and React frontend achieving **30%** code quality improvement, reduced Azure costs by **~5%**, and migrated report generation to Azure Functions eliminating timeouts on large datasets.
- Implemented **CI/CD pipelines** via Azure DevOps to automate deployments to Azure App Service, streamlining release cycles and reducing manual effort.

Software Engineer – Lumovy Technology Solutions (Client: Microsoft)

Jul 2024 – Mar 2026 | Remote

- Collaborated with multiple Microsoft FTEs teams on Microsoft's Contact Enrichment Services, Cascade Routing, and ISV solutions.
- Contributed to the architecture, modularity, design improvements and Resolutions of Microsoft's **Service 360 items**, successfully delivering **40+** deliverables across multiple sprints.
- Engineered high-performance and scalable Microsoft services using .NET/.NET Core and Azure, ensuring system reliability and long-term maintainability.
- Actively participated in pull request reviews to ensure code quality and effective collaboration with Microsoft employees, reviewing **150+ pull requests**.
- Owned end-to-end migration from Informatica to Clearout for Microsoft's Contact Validation services, engineering **retry automation** background services deployed on AKS for high availability and fault tolerance.
- Developed and integrated conversational AI chatbots using **Azure OpenAI**.
- Delivered **200+ production deployments** leveraging **CI/CD pipelines** with **Azure DevOps**, streamlining release cycles and reducing downtime.
- Increased **unit test coverage from 76% to 90%**, strengthening software reliability and stability.
- Upgraded multiple Microsoft applications from **legacy codebases to modern frameworks**.
- Utilized AKS, Azure App Services, Function Apps, and Azure WebJobs to build, deploy, and maintain highly available, cloud-native workloads.

PROJECTS

Microsoft Contact Enrichment Services | Client: Microsoft

Oct 2024 – Present

- Owned the **Informatica to Clear-Out Migration** for **Microsoft's** Contact Validation Services and delivered multiple .NET Core microservices using Azure Functions & Web APIs, Azure Service Bus, Cosmos DB, Blob Storage, and Key Vault fully automated via Azure DevOps CI/CD and deployed on AKS powering high-volume contact enrichment for integrated systems One Marketo, MSX, CDES, and other Microsoft systems.
- Engineered generative AI solutions using Azure OpenAI and .NET, integrating LLM-powered capabilities into cloud-native systems to drive automation, improve operational efficiency, and enhance user experiences.
- Developed and optimized **.NET Core Web APIs and AI Chatbots**, improving backend performance by **~35%**, and enhanced the React-based **CDES Portal**, boosting user experience and responsiveness by **~30%**.
- Architected and integrated **Managed Service Identity (MSI)** for authentication, eliminating **100% of manual secrets** for all the Azure services including servicebus, Azure Key Vault, Azure event hub and reducing overall security risk by **~40%** in alignment with Microsoft security standards.
- Established service-layer auditing using Microsoft provided Geneva **OpenTelemetry** for 20+ microservices hosted on AKS as well on Azure app service, reducing issue resolution time by **~35%** and improving platform observability.

Microsoft Cascade Routing | Client: Microsoft

Jun 2024 – Dec 2024

- Served as .NET Full Stack Engineer, building scalable React.js + TypeScript front-end modules with reusable UI components.
- Designed and implemented **.NET Core Web APIs**, achieving secure, high-performance communication.
- Leveraged **Azure Cloud Services** for data storage, workflow automation, and system scaling, improving application reliability reducing locale management turnaround time by **~40%**.
- Ensured maintainability, security, and compliance by strictly adhering to **Microsoft's secure coding standards** and best practices.
- Consistently delivered time-critical work with clear communication, earning strong appreciation from stakeholders.

TECHNICAL SKILLS

Backend : ASP.NET Core (Web API, MVC), ASP.NET MVC, Entity Framework Core, Dapper, ADO.NET , RESTful API Development , Microservices Architecture

Frontend : React.js (Hooks, Context API, Redux), Next.js , HTML5/CSS3, Tailwind CSS, Bootstrap

Databases & Search : Microsoft SQL Server, Azure SQL Database, Azure Cosmos DB, PostgreSQL, MongoDB, Redis, Vector Databases, Azure AI Search (Cognitive Search)

Messaging, Queues & Communication: Azure Service Bus, Azure Storage Queues, Pub/Sub patterns, RESTful APIs

Cloud & Azure Services: Azure App Services, Azure Functions, Azure Service Bus, Azure Logic Apps, Azure Key Vault, Azure AD, Azure Blob Storage, Azure DevOps (CI/CD), AKS, Azure OpenAI, OpenTelemetry

DevOps & Tools: Docker, Git/GitHub, CI/CD Pipelines, Power Platform (Power Apps, Power Automate, Power BI), Microsoft Dynamics 365, Firebase, Jest, Swagger

EDUCATION

Bachelor of Science in Information Technology (BS IT)

2020 – 2024

Punjab University College of Information Technology (PUCIT, LAHORE)

CGPA: 3.40

LEADERSHIP EXPERIENCE

Mentor & Onboarding Lead @ SSI

Apr 2026 – present

Mentored and onboarded fresh graduates, accelerating their proficiency in .NET, React, and Azure technologies.

Mentored Intern @Lumovy Technology Solutions

Jul 2025 – Sep 2025

Mentored an Intern at LTS in Full-stack software development (.NET and React) with Cloud / Azure Integrations

Teacher Assistant | PUCIT

Jan 2024 – Jun 2024

Conducted labs and guided students In the 'Database Systems' course for Two Different batches at PUCIT, aiding in the practical application of data principles.
Assisted students in understanding complex topics and conducting practical exercises and Labs for the 'DSA Course' and 'AI/ML' course.

CERTIFICATES

- AZ-900 Azure from Microsoft
- Developing CI/CD Solutions with Azure DevOps
- Communication Excellence by Homan Compass

- Foundational C# with Microsoft
- .NET Architect by C# Corner
- Kubernetes: Microservices
